

Client360 Platform

Modern SaaS workspace unifying Clients, Contracts, Operational Units, Pricing & CAGs

Business Problem

- **Fragmented screens** — client, contract & pricing managed in silos
- **Heavy navigation** — deep drill-downs, repeated page loads
- **Limited visibility** — no single view of operational health
- **Pricing opacity** — OU-level overrides not visible vs contract base

Business Value

- **Unified workspace** — Clients, Master Data, Invoices in one shell
- **Inline editing** — expandable rows with edit-in-place sections
- **Action-first hub** — exceptions & pending work surfaced upfront
- **Premium UI** — Optum-aligned tokens, accessible & responsive

The Result

- **Executive Summary landing page** — KPIs, revenue trends & segment mix at a glance
- **Core Action Hub** — failed jobs, unmapped CAGs & system health in one place
- **Configuration redesigned** — Contracts, OUs, Pricing matrix & CAGs under one tabbed view
- **Collapsible navigation** — maximize workspace, persisted user preference
